## Problem E. Elephants

```
Input:
Standard
Output: Standard
Author(s): Daniel Vega Santos - UFPS Colombia
```

" $N$ elephants went out to play on a spider web one day". Having a set of $M$ elephants, each one with a weight $w_{i}$ where $1 \leq i \leq M$, and knowing the maximum weight that the spider web supports, what is the largest number of elephants that you can put in the spider web without breaking it?

## Input

The first line of input contains a non negative integer meaning the number of test cases. Each case starts with a line with two integers $M$ and $W$, the number of elephants and the maximum weight that the spider web supports ( $1 \leq M \leq 10^{5}$ and $1 \leq W \leq 10^{8}$ ). The next line contains $M$ numbers $w_{i}$ representing the weight of each elephant $\left(1 \leq w_{i} \leq 10000\right)$.

## Output

Print a single line per test case with the largest number of elephants that you can put in the spider web without breaking it.

## Example

| Input | Output |
| :---: | :---: |
| 3 | 1 |
| 514 | 4 |
| $\begin{array}{lllllll}10 & 15 & 16 & 17 & 18\end{array}$ | 3 |
| 420 |  |
| 1234 |  |
| 522 |  |
| 91877 |  |
